TO WHOM IT MAY CONCERN

I, IW Stevens, declare that Jager Technologies Pty Ltd installed a 100 Kw grid the solar generation system on Louis Botha THS premises in Victoria Road, Willows, Bloemfontein and that the grid works as expected.

Discussion

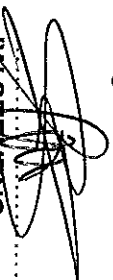

A Load profile of the school was carried out by only a test meter installed to capture the load before sizing the solar installation.

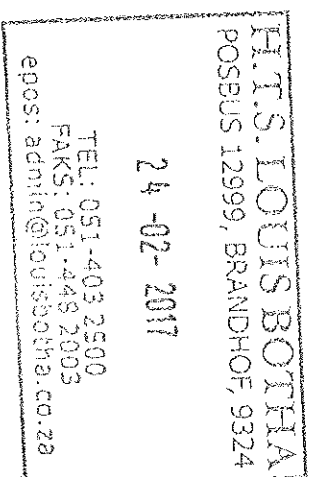

After installation of the 100 kw system a load profile is regularly checked by Jager Technologies. The load is kept on an online system and can be viewed if and when necessary.

A maintenance contract is in place and maintenance is the responsibility of Jager Technologies.

The system is currently used by Jager Technologies to show other school how the system operates.

Regards

IW STEVENS
